

Welcome to the Patroklos area, a paradise for scuba divers located just 60 kilometers south of Athens

The Kastelorizo aquaculture farm in this area has the potential to become a major tourist attraction, thanks to the efforts of Wings ICT and Planet Blue dive center.

In the past, the local community was divided on the presence of the aquaculture farm, with some residents concerned that it might negatively impact the beauty of the landscape and hinder the growth of the local tourism industry. However, with the help of Wings ICT solutions, the farm and the dive center are working together to monitor key environmental parameters to preserve the natural beauty of the area and prove that multi-use can benefit the community as a whole, by bringing more tourists to the area.

The Kastelorizo aquaculture farm is included in scuba diving tours organized by Planet Blue. The farm can provide a unique natural beauty experience for divers, as the farm, creates an abundance of marine life in the area.

Patroklos project has the potential to be rolled out to other suitable areas in Greece and beyond, turning aquaculture into a tourist asset rather than a source of concern for local communities.

We invite you to come and experience the beauty of the Patroklos area for yourself and see the positive impact that multi-use can have.
